Your EPF balance isn't your retirement fund.

Only part of it is. Here's why.

Since May 2024

Every contribution is split 3 ways.

Where each ringgit goes

75% **Akaun Persaraan**
Retirement. Locked until 55.

15% **Akaun Sejahtera**
Housing, education, health.

10% **Akaun Fleksibel**
Withdraw anytime.

So for every RM1,000 contributed

RM750

reaches your retirement account.
RM150 to Sejahtera, RM100 to Fleksibel.

The part most people miss

Basic Savings is measured on Akaun Persaraan only.

Not your total balance. Check the right number.

Every Fleksibel withdrawal has a cost

≈RM308

in dividends lost in a year on a RM5,000 withdrawal, at EPF's 6.15% rate for 2025.

What to do

1. Track **Akaun Persaraan**, not the total

2. Leave Fleksibel alone unless it's a real emergency

3. Topping up? Only 75% reaches your retirement account

Share this with someone who only checks the total.

DM “**RETIRE**” for a free retirement check.
